

# Propane Autogas Vehicle Technician

**Instructor Manual**

National Alternative  
Fuels Training Consortium

A Program of

 West Virginia University

The Propane Autogas Vehicle Technician curriculum is a product of a partnership between the National Alternative Fuels Training Consortium (NAFTC) and the Propane Education & Research Council (PERC). The purpose of the partnership is to foster a strategic alignment and a collaboration of resources to provide a state-of-the-art training opportunity for Propane Autogas vehicle technicians and supporting audiences, such as fleet managers.

The partnership combines the skills, knowledge, and resources of the NAFTC, as an educational provider of alternative fuel vehicle training and PERC, who represents the propane autogas industry, and works to provide materials to ensure safe propane use.

## Table of Contents

Chapter 1: <b>Overview of Propane</b>
Chapter 2: <b>Fuel Theory</b>
Chapter 3: <b>Propane Fuel Systems</b>
Chapter 4: <b>Safety</b>
Chapter 5: <b>Vehicle Compatibility Analysis</b>
Chapter 6: <b>Ignition Requirements</b>
Chapter 7: <b>Fuel Tank Installation</b>
Chapter 8: <b>Fuel Supply Line</b>
Chapter 9: <b>Regulator Installation</b>
Chapter 10: <b>Fuel Injector Systems</b>
Chapter 11: <b>Fuel Switching</b>
Chapter 12: <b>Electronics Interface</b>
Chapter 13: <b>Tank Purging</b>
Chapter 14: <b>Post Installation Procedures</b>
Chapter 15: <b>Fuel Dispensing</b>

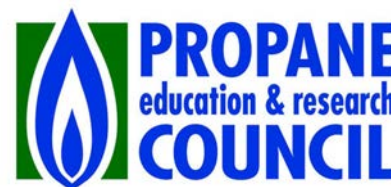

### Acknowledgments

Many individuals and organizations in academia, government, and industry participated in the construction, review, and production of these materials.

The National Alternative Fuels Training Consortium (NAFTC) thanks and acknowledges:

- The Propane Education and Research Council (PERC) and its members for their guidance and support in the development and distribution of this educational endeavor
- The Curriculum and Training Development Team of the NAFTC for project development and input throughout the construction of this course
- The National Research Center for Coal and Energy for oversight and support of the project

The NAFTC, a program of West Virginia University in Morgantown, West Virginia, developed these materials with funding from the Propane Education and Research Council (PERC).

Funded by:

The Propane Education & Research Council is a check-off program authorized by Congress and established, operated, and funded by the propane industry. Its safety, training, and research and development programs promote the widespread adoption of propane autogas as a clean, American-made, affordable source of energy. This propane autogas technician training developed in partnership with the National Alternative Fuels Training Consortium reflects the rise in popularity of the fuel among the nation's fleet managers, the availability of a growing number and variety of emissions-certified vehicles running on propane autogas, and the propane industry's commitment to the safe use, handling, and storage of propane.
